PROFILE SUMMARY

Software Engineer with 4.5+ years of experience in product-based and service-driven environments. Experienced in building end-to-end web and SaaS applications, including product flow analysis, requirement discussions, UI collaboration, and REST API integrations. Strong background in developing React-based dashboards and CMS-driven platforms, working closely with backend teams to deliver scalable solutions across finance, transportation, and analytics domains.

KEY SKILLS

Frontend & Product Development

React.js, JavaScript (ES6+), Dashboard Development, SaaS Application Development, Product Flow Analysis

Backend & Integrations

REST API Integration, Data Handling, Payment Gateway Integration, CMS-Based Development

Product & Design Tools

Figma, Adobe Illustrator, Wireframing & Flow Design

Tools & Platforms

Git, GitHub, Vercel Deployment, Agile / Sprint-Based Development

---

PROFESSIONAL EXPERIENCE

Software Engineer

Bonbloc | June 2025 – Present

- Contributing to end-to-end SaaS product development by translating product flows and Figma designs into scalable React-based UI implementations.
- Developing responsive interfaces using React.js (ES6+, Hooks) and integrating REST APIs for dynamic data handling.
- Collaborating with backend teams to define API contracts and ensure seamless frontend-backend integration.
- Building domain-driven modules and dashboards across transportation, finance, and analytics systems.

Web Developer

BT Infotech, Chennai | Aug 2024 – May 2025

- Developed and enhanced client-facing web applications with a focus on functional and scalable solutions.
- Implemented API integrations, data handling logic, and payment gateway workflows for business websites.
- Managed code versions using Git and supported application deployments on platforms like Vercel.

Project: Client Websites & Integrations

- Worked on developing and managing multiple client websites with required features and integrations
- Supported API-based data exchange and payment gateway functionality

---

Programmer Analyst

Ennuviz Labs & Technology, Chennai | Jun 2023 – Jun 2024

- Engaged with clients to gather requirements, discuss workflows, and define functional flows using Figma-based designs.
- Implemented website revamps, headless CMS solutions (Sanity with Next.js), and handled website migrations.
- Collaborated with teams to maintain, enhance, and deploy applications across different hosting environments.

Project: ChinmayaGita Website (Education Domain)

- Developed an educational website from scratch by coordinating closely with the client on requirements and content structure.
- Implemented the platform using WordPress and Elementor with API integrations and AJAX for enhanced user experience.
- Managed database handling and GoDaddy hosting migration for seamless deployment.

PHP Developer

Reach | Apr 2021 – Mar 2023

- Contributed to the development of a product-based automation and billing software platform.
- Built and enhanced application modules using Core PHP, Yii2 framework, MySQL, and AJAX.
- Worked closely with product and QA teams to implement features and resolve issues.

Project: Automation & Billing Software

- Developed billing workflows supporting multiple business types with automated GST calculations.
- Improved tax accuracy and operational efficiency through backend feature enhancements.

IT Support Engineer

Eagle Fleet Services, Coimbatore | Nov 2018 – Apr 2020

- Supported end users with system setup, user access assistance, and troubleshooting hardware and software issues.
- Coordinated with senior IT teams to ensure smooth day-to-day IT operations.

Production Engineer

Sakthi | Jun 2016 – Sep 2018

- Supported production operations by monitoring processes, ensuring quality standards, and coordinating with cross-functional teams.

EDUCATION

Bachelor of Engineering (Mechanical Engineering)

JayaSurya College of Engineering
Graduated: May 2016

CERTIFICATIONS

- Diploma in Frontend Web Designing
- PHP Certification
- Python Certification

KEY STRENGTHS

- End-to-End Product Development
- Client Communication & Requirement Analysis
- Product Flow & Design Thinking
- API Integrations & SaaS Solutions
- Cross-Functional Collaboration
